

PerigonSM Tools

FIVE COMPONENTS

PerigonSM Tools are a library of specialized templates, symbols, stencils, matrices, instructions and best practices developed exclusively by Business Enterprise Mapping. They contain a wide variety of applications along with a wealth of best practice within its libraries that has been accumulated from working with over 300 businesses, in 60 industries, across 5 continents going back over twenty years. by Business Enterprise Mapping. The PerigonSM Tools consist of five main specific accessories:

TEMPLATES

The basic mapping templates have been created in Microsoft Visio to standardize the process map for use among any industry or department. The clear format is easy to create, understand, follow and edit.

ICONS

Business Enterprise Mapping has developed icons to provide consistency as well as visual guidelines for multilingual and international enterprises.

BEST PRACTICES

Working around the globe, Business Enterprise Mapping has gathered tried and true, fail-safe process standards that can immediately be implemented for fast and effective cost-savings and process improvement.

MATRICES

To allow for continuous improvement, matrices have been developed to gather and pinpoint opportunities for improvement both at the processes and system levels within the enterprise.

ANALYSIS

Business Enterprise Mapping has developed a score card system which allows enterprise standings easily and directly to leadership.
